Nyhet

A completely keeless lock

Duo Code

The Swedish made locking system

Standalone locking system with easy, protected installation on the inside of the door

Easy to install
The Exma Duo is a standalone solution, easy to install. No further wiring or perforation of the door is required. The unit is mounted under the door pressure and cylinder ring and works with standard-type modular locks.

User friendly
The system is very convenient for the user. All features are directly available via the keypad on the device.

Safe and secure
The system holds up to 999 codes with a length of 3-7 digits each.
